

The high-quality, durable library prebound books that we produce in our bindery are only available for purchase from Children's Plus.

The**Plus**Factor

CPIBoundBooks

...only from childrensplusinc.com

The**Plus**Factor brings additional value with CPI Bound books which are known as the absolute best prebounds in the industry. We stock up to 20,000 different titles—the only books available on the market that feature our strict quality standards. CPI Bound books withstand repeated use, making them the perfect choice for increased circulation of high-demand titles and classroom sets.

The following **PLUS**-oriented features make our books truly unique:

- + The strongest, most durable binders' board in the industry
- + Side-sewn and assembled by hand in our on-site bindery
- + 100% water-based resin adhesive (not animal protein glue)
- + Bright, sharp, beautiful, appealing covers
- + Laminated with a durable, easy-to-clean textured finish
- + Safe, rounded Library Corners
- + **Backed by a 100% guarantee!**

When looking for the best prebounds

...**Make sure you're CPIBound!**

ThePlusFactor

CPIBoundBooks

Our own studies have determined that our bindings typically withstand well over 500 circulations. Here's just a few reasons why...

Features

Benefits

Davey Red Label
high-density binders board
(25% thicker plus 25% higher in
density than the competition!)

Results in a rugged, sturdy book that
can withstand many circulations without
losing its shape.

Helps prevent damage due to normal student
wear and tear such as being thrown around
in book bags.

100% water-based
resin adhesive

Promotes a "green" environment in schools.
It's safe, non-toxic and non-flammable.

The adhesive produces an extremely strong bond
making it resistant to the fluctuations of hot and
cold temperatures that circulated books are
exposed to.

Adhesive highly superior to
commonly used animal glue.

It will not deteriorate over time.

It will not create mold in high-humidity
conditions.

CPI uses advanced, 4-color
digital technology from Xeikon
to reproduce book covers.

Maintains the integrity of the original art
resulting in bright and sharp covers that are
attractive to library patrons and students.

Laminated covers

Protects the book from scuffing and moisture.

Increases circulations - typically over 500. Great
return on your investment in quality books.

Side-sewn and
assembled by hand

Leads to durability. Pages do not fall out.
Each book is hand inspected.

Rounded Library Corners
verses Trade Edition Corner

Rounded corners are less likely to snag
on something and fray.

**When we say we're adding even more CPIBOUNDS
...that's what we're growing to do!!**
