**T**he S.T.E.M. initiative realigns traditional math and science education making career readiness a priority for all learners. Children's Plus, Inc. encourages a 21st century learning environment where students not only have the curiosity to wonder why, but the motivation to discover how. We equip schools and libraries with the materials needed to develop a solid foundation in the increasingly complex subject areas of Science, Technology, Engineering and Mathematics.

**S.T.E.M. + Art = S.T.E.A.M.** The primary goal of S.T.E.A.M. is to drive innovation by mixing creative thinking into a basic understanding of math and science principles. Integrating the Arts back into K-12 education is an essential component of establishing collaborative classrooms and visionary learners. In addition, Arts education prepares students for sustainable, productive careers by recognizing multiple intelligences and fostering a differentiated learning environment

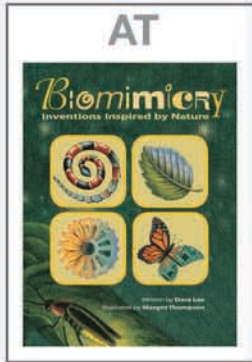

**A** fully-integrated S.T.E.M./S.T.E.A.M. curriculum will challenge our students to design, build, invent and develop global solutions for the real world.

# inspired by nature

## grades 4-5 text set

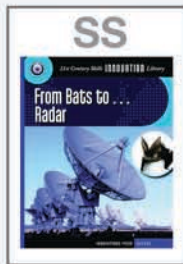

This biomimicry text set is just one of the custom collections we've designed to bring S.T.E.M. into your classroom. Our Collection Development team has created a variety of S.T.E.M. and S.T.E.A.M. lists organized by interest level, theme, budget and publisher recommendations that are ready to shop now!

**We specialize in building custom collections. Contact us today for real world solutions.**
